Training run report: data160k-b8-t1024-40k-lr1.2e-3-wu256k

Run `20260929-032549-f0e6e14-data160k-b8-t1024-40k-lr1.2e-3-wu256k` · checkpoint `modal_data160k-b8-t1024-40k-lr1.2e-3-wu256k_steps40000_seed42.pt` · generated 2026-10-09 17:20 UTC. A decoder-only Transformer language model (GPT-2 tokenizer, 50,257 tokens) trained from scratch; every number below is from the project's fixed evaluation harness, identical across models. Lower loss is better; the glossary at the end defines each metric.

Dataset: data160k

````
# data160k

Built 2026-09-28. Train is new; **val is data20k's, byte for byte**, the same
measuring stick as data20k, data40k and data80k.

| file | tokens | docs | sha256 |
|---|---|---|---|
| train.pt | 159,204,972 | 160,000 | `c6d7fe4a8f0cabd74b6a9b8f632c586fc0733986a238e003eff6a8c1a77e0a18`
|
| val.pt | 918,728 | 937 | `28b1041acaa527ac6d7e0a464b07115e766c5bf76252ecbc56a8519de02569ee` |

How it was made:

```bash
uv run mini-llm-prepare-data --num-examples 160000 --val-examples 1 --seed 0 --out-dir <tmp>
# keep <tmp>/train.pt; discard its 1-doc val
cp -p data/data20k/val.pt data/data160k/val.pt
```

Verified:
- data80k/train.pt is an exact prefix of data160k/train.pt (one seed-0 scan
  order: 20k ⊂ 40k ⊂ 80k ⊂ 160k).
- val.pt is identical to data20k/val.pt.
- 0 of the 937 val docs appear in train.pt
  (`python -m mini_llm.token_overlap data/data160k/val.pt --exclude data/data160k/train.pt`).

At the 122.88M-token budget (B64 × T128 × 15K) this is ~0.77 passes. Batches
are random crops drawn with replacement, so that still means only ~54% of
train tokens are ever seen, and ~30% of presentations are repeats.
````

Glossary

metric	meaning
full_val@c	Mean next-token loss (nats) over every token of the fixed 918,728-token validation set, in windows of c tokens. Lower is better. full_val@1024 is the headline number.
L(c)	Fixed-target context curve: loss on the same 8,000 target tokens given exactly c tokens of history. Comparable across models at equal c.
cb@W	Context benefit: loss with the real preceding W/2 tokens vs. a prefix from a different document, on identical windows. Nats of help from relevant context (± standard error).
retrieval@d	Forced choice among 10 candidates (chance 10%): can the model pick the token that appeared d tokens earlier? Tests using information far back in context.
degenerate	Samples (of 100) that end in an exact loop OR have rep4 >= 0.5, with its 95% CI. The headline repetition number: exact loops alone miss repetition that never settles into a verbatim cycle.
rep4	Share of repeated 4-grams in a generated sample (0 = no repetition). Median over 100 samples; also counted at >= 0.3 / 0.5 / 0.7.
near-loops	Samples whose tail repeats: from some token on, every 64-token window has rep4 >= 0.5. Onset = where that tail starts (median).
exact loops	Samples (of 100) that end in a verbatim repeating cycle of at least 32 tokens, with its 95% CI. A strict subset of the degenerate samples.
topic held	Share of samples still mentioning the prompt's subject near the end of the 256-token generation.
distinct-2 / -4	Distinct bigrams / 4-grams over total, a diversity measure.
generation protocol	20 frozen prompts x 5 seeds, 256 new tokens, temperature 0.7, top-k 40, stop at EOS; identical for every model.

```
Albert Einstein was a German-born theoretical physicist who was not in Berlin but in the late 1800's.
His experiments and observations of Einstein's work were not found in the United States.
He was the first German-born father of the Nobel Prize for Chemistry. He was also a fellow German-born
mathematician, and he used the scientific theory to prove the best way in the scientific world. He was
a chemist and scientist, while he was the first one to be called the physicist. He was a German chemist
and chemist, and his team of physicists at the University of California.
Physicist works in Germany in the 18th and early 1900's. He graduated from the University of
California, Berkeley, a scientist of the American Academy of Sciences. He has been a pioneer in the
science of science. He has studied physics and physics, chemistry, chemistry and chemistry, and
chemistry. He has been working on science and science at the University of California.
The University of Oregon is studying physics and chemistry, chemistry, chemistry, chemistry, and
physics. He is a chemistry professor at the University of California. He has been studying physics and
chemistry, chemistry, chemistry, and chemistry. He has been working on science, chemistry, chemistry,
and science at the University of California.
He is a chemistry physicist and science at

Albert Einstein was a German-born theoretical physicist who was involved in the creation of a new
generation of physicists. His work was the first of the first time, and he was eventually able to find
the Universe, a new physics-science-based experimental physicist, known as Einstein.
Researchers from the University of California have found that there are several different types of
magnetic fields that have been used in the field of physics. These are highly specialized applications
in computer science, which are magnetically studied.
There is also a new study on how magnetic fields are used in magnetic fields, such as the magnetic
fields.
The magnetic field of physics is a very new study of how magnetic fields are studied.
The magnetic fields are a large magnetic field, or a large magnetic field, and their magnetic fields
are magnetic fields.
The magnetic fields are magnetically studied and are known for the magnetic field of physics. The
magnetic fields are known for the magnetic field of physics, and they are used in magnetic fields.
The magnetic fields are magnetically studied, and are known to be magnetically studied.
However, magnetic fields are highly specialized, as they have a magnetic field.
They are magnetically studied, and they have a magnetic field.
These fields are magnetically studied and are known for the magnetic fields of physics

```
Albert Einstein was a German-born theoretical physicist who was the first to think Einstein. He was
also an Einstein physicist who was a physicist and physicist who was the first to do research. The term
Einstein is the first to think that Einstein has not been a science student since his death.
A number of physicists would look to Einstein's theory as a scientific physicist. Einstein is a
physicist. He would be very interested in Einstein's work, but it would be a lot easier. Einstein's
theory is called Einstein. Einstein, though, Einstein would have been a physicist. Einstein would be a
physicist.
"The first thing we think is to think about Einstein," Einstein said. He told the statement.
The Einstein Einstein is a physicist who has not been a scientist when he has been a physicist. He
would be the best scientist for the matter physics of the time. He worked in the lab, but that doesn't
have been a Nobel Prize in Physics.
"We are going to be the first of them to be a scientist. They would be a scientist," he said.
"You have come across the table to find out that the Einstein has made the first time in physics," he
said.
The first time in physics is to think about Einstein's theory. He has been fascinated to think about
Einstein's

Oxygen is a chemical element with a few-sexygen containing molecules, including the hydrogen- and
oxygen atoms. (From the molecular level of the molecule to the hydrogen- and oxygen atoms, the molecule
is at a certain rate), whereas the nucleosomes in the molecular level of the two molecules is only in
place, which is known to play a role in the regulation of the cell's structure and the dynamics of the
cell's structure.
The drug of cancer cells is one of the most promising drugs for cancer, and the drugs are both
promising. The drug of cancer drugs is currently linked to the development of cancer.
The drugs are now available to help the patients have more opportunities for cancer, and these drugs
are very effective against cancer.
The drug is then used as a drug to treat cancer. It is used to create high-quality drugs that are used
in the prevention of cancer, but this can also help patients develop cancer.
The drug of cancer is not as effective as long as it is, and it can be used as a drug to treat cancer.
This drug is used to treat cancer in patients with cancer but also for cancer patients with cancer.
The drug of cancer is also used to treat cancer in patients with cancer and also to treat cancer.

Inflation occurs when the inflation rate is between 40 and 40. This is not the case because it may not
be as if the inflation rate is between 50 and 59.
The inflation rate is between 40 and 40. This will increase the rate of the inflation rate over the
last month. This will decrease the rate of the inflation rate. If inflation is between 50 and 50, it
increases the rate of the inflation rate for both the inflation rate and the inflation rate.
The inflation rate is between 60 and 30. This will increase the rate of the inflation rate. If
inflation is between 40 and 41, it is only 15, and the inflation rate will decrease the inflation rate
at 20. This will increase the rate of the inflation rate for both the inflation rate and the inflation
rate.
This will help you to get the inflation rate under the next month.
If inflation is between 40 and 50, it is important to keep the inflation rate free. If inflation is
between 50 and 50, it is recommended that it is a good idea to do some inflation rates with 30.
This will help you determine if inflation is between 45 and 40, the inflation rate will increase. For
example, you should be able to multiply the inflation rate. This will help you determine if inflation
is between 50

Inflation occurs when people who are in the middle income category are less likely to be affected by
the price, which means they are more likely to be used to buy. If inflation is not regulated, the
question is, is that it is not a source of revenue and that is not expected to be used as a substitute
for a given income. There is a general need to do this by saying that the price of a given income has
been given.
The price of a given income is not the amount of a given income that is earned in the income category,
and that is it all depends on the price of a given income. The price of a given income is not a given
income. This is the cost of a given income. The price of a given income is given for the income of the
given income of the given income. Similarly, in many other ways, the given income is not the same as
the value of the given income in the given income. Similarly, in the lower income, the given income of
the given income of the given income of the given income of the given income of the given income of the
given income of the given income of the given income of the given income of the given income of the
given income of the given income of the given income of the given income
